

CCTV PREVENTATIVE MAINTENANCE

The Australian Standards recommend the servicing of a CCTV system once a year.

Why do I need a preventative maintenance?

- Improve reliability
- Increase lifetime
- Optimise equipment
- Reduce false alarms
- Eliminate faults
- Update security risks

Preventative Maintenance will decrease downtime due to unexpected equipment failures. To book in your service go to: <https://www.a1s.com.au/contact-us/> or PH: **1300 217 000**

REGULAR TESTING

Your CCTV system should be tested on a regular basis, using a monitor, mobile device or PC. Site security risk will determine how often the following should occur.

Example:

- ✓ Daily – VIEW cameras are on and functional (no video loss)
- ✓ Weekly – PLAYBACK recorded footage
- ✓ Monthly – CLEAN lenses from environmental factors (cobwebs, dirt and grime)

Note:

NEVER TURN OFF YOUR CCTV SYSTEM as this will compromise your site and you risk costly repairs.

NOTIFICATION OF FAULTS

It is important to notify A1 Security Solutions immediately of any faults in the CCTV system. Also seek evaluation of your security requirements from A1S if the use or layout of the premises or the level of risk changes from that applying at the commencement date.

NVR USER FUNCTIONS

Search & Play

1 Click Search

2 Click Time Search

1 Select Layout

2 Select Date

3 Select Channel

4 View preview by moving the time bar.

5 Click ▶

The interface shows a 3x3 grid of camera feeds. The left sidebar contains search filters (Time search, Event search, Text search, Export search, ARB search, Bookmark search), layout selection (Layout 01, Layout 02, Layout 03), and a date calendar. The bottom of the interface features a time bar for playback navigation, with a play button and a '24 Hours' view selector.

Export recorded video to USB flash drive

2 Select layout

3 Select channel

4 Set the time, device and format for export.

1 Click

5 Click the <Check capacity> button to see if you can export.

6 Click the <Start> button to proceed with the export.
